

pot machines

Whirlpool pot machines are all made of stainless steel AISI 304 with double skinned outer panel construction to reduce noise level and surface temperature. A diagonally mounted self-draining wash pump is included in this range and guarantees a higher hygiene level. As for the other Whirlpool dishwashing appliances, the Whirlpool pot machines work with independent wash and rinse arms that guarantees best performance in all cycles.

WHIRLPOOL

DISHWASHING

rack conveyor machines

The Whirlpool rack conveyor machines range is vast and includes models that have both right and left hand access to better fit the customer's requirements. Designed and built with innovative techniques and modular flexibility where single elements can easily be assembled and detached, Whirlpool rack conveyor dishwashers can be adapted to a wide variety of needs in terms of capacity and size to create tailored solutions for any professional dishwashing needs.

the range

In its range of professional equipment for the catering industry, Whirlpool offers a variety of dishwashing appliances that combines state of the art technology with the highest quality and safety standards.

The range of dishwashing appliances includes top class glasswashers, front loading undercounters, hood, pot washers and rack type washers. All Whirlpool professional dishwashing equipment features exceptional performances, and selected models also feature HACCP software.

The range ensures high quality and reliable technology and offers a number of different dimensions, capacity of baskets as well as many different options to satisfy all the needs of the most demanding customer. All machines are tested individually on all functionalities and are equipped with double skinned outer panel construction to reduce noise levels and surface temperatures.

The product range has tank, frame and panels manufactured in AISI 304 stainless steel. Products have moulded tanks with round corners so they are easy to clean and have better water circulation and thus, better wash results. Noise level is minimal thanks to the insulation of the doors.

An extensive line of accessories completes the vast dishwashing professional range.

glass washers

As for all other products in the Whirlpool dishwashing family, the wash arms of the glass washers have a special design that ensures perfect washing of glasses and dishes even when placed in the basket corners, thus offering maximum hygiene during the operation. Models are available with built-in water softener and with integral drain pump and a variety of customizable possibilities.

frontal dishwashers

The Whirlpool range of frontal dishwashers like the rest of the Whirlpool range, has independent stainless steel wash and rinse arms. This particular feature avoids the mixing of wash and rinse waters thus guaranteeing the best washing performance. Besides the models with mechanical panels, a model with an electronic panel is also included in this range.

hood dishwashers

The range offers both electronic panels and one mechanical panel and all come with an auto-self draining wash pump to ensure better standards of hygiene. In fact, the wash pump is mounted diagonally in the machines allowing for a much better water drainage of the stagnant water in the pump. The tank is fully moulded with double stainless steel filters and shallow bottom tank for best water drainage and to prevent dirt accumulating in the pump.
